

Acorn User Adventure

Points to note:

1. The starting location is random, but the map is always the same.
2. The game is in real time. You must escape before you run out of air.
3. There are boxes in random locations. Each box contains a letter of the magic word or extra air.
4. You need to type a number to open a box. The correct number is 360 divided by the number of sides of the box lid. E.g. if the box lid has a 4 sides, the answer is 90.
5. The letters are A, E, M and T, which re-arranged spell META.
6. To escape, you need to get to Redwood reception, say the magic word and go up.

Obviously a walkthrough is impossible as the starting location and location of the boxes is random.

However, noting the points above and the map below you should be able to make it through.
