Briney Deep walkthrough

This is a simple adventure, one that really doesn't need a walkthrough, just make a map as you go and you should be right. But, there are two "pain points":

1. When referring to the life boat you need to enter a verb (as is the norm) followed by "life boat" as two words. "life", "boat" and "lifeboat" will not work
2. There is an error in the game making it impossible to solve. It involves entering a combination which is a three digit number. This has now been fixed and the disk updated.

Commands

You only need to enter directions, Bow, Star(board), Stern and Port. Other commands needed are Exam(ine), Read, Star(t) and Lowe(r)

Some tips
Read the captains log
Examine the locker and read the message
For a laugh, examine the toilet and shower
Start the motor (attached to the winch)
Lower the life boat only after starting the motor
Enter the combination (noting the advice above)
You need to find two clues to work out the combination

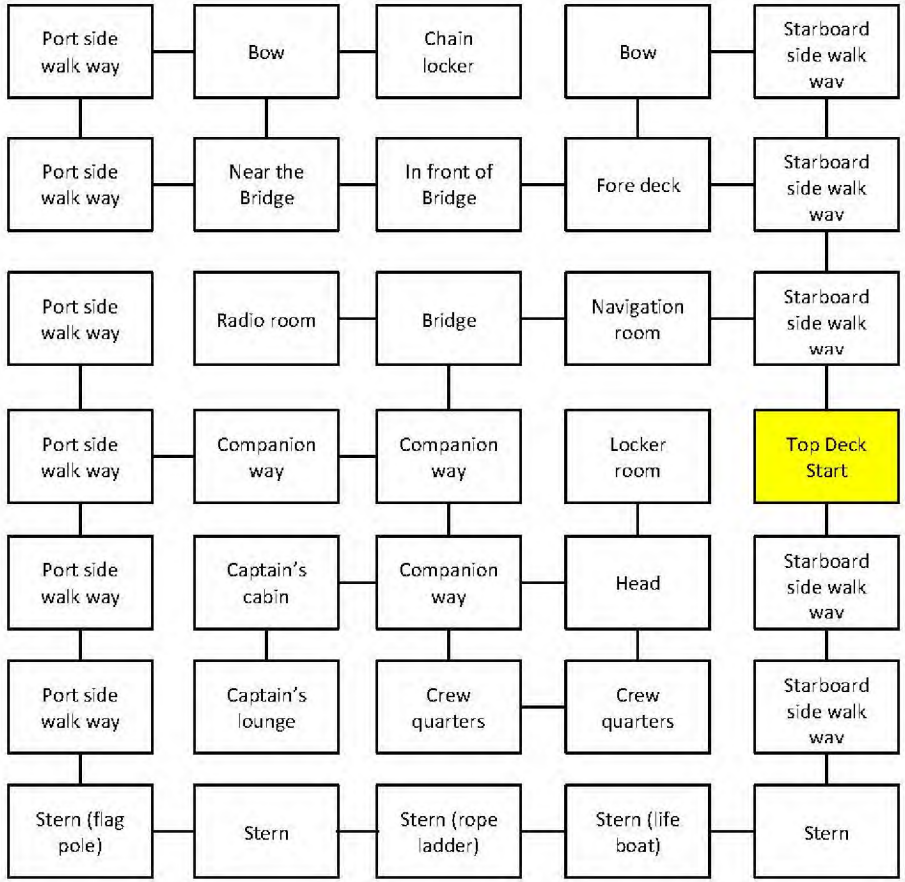

Map overleaf.
